DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

With respect to claims 1 and 8, the applicant is advised to select the same type of species for claims 1 and 8. The selection of species must be either single bond or double bond between C1 and C2 and R¹, R², R³, R⁴ and R⁵ species corresponding to the single bond or double bond compounds as followed:

i) the bond between C1 and C2 is a single bond;

- R¹ is methyl, ethyl, i-propyl, n-propyl;
- R² and R³ are independently hydrogen or methyl; or

R² and R³ taken together is a divalent radical (CH₂)_n, C(CH₃)₂, or CH(CH₃) which forms a cycloalkane ring together with the carbon atoms to which it is attached;

- R⁴ and R⁵ are independently hydrogen or methyl; or

R⁴ and R⁵ taken together is a divalent radical (CH₂)_n, (CH₂)_n.ICH(CH₃)₂, or (CH₂)_n.tCH(CH₃) which forms a cycloalkane ring together with the carbon atoms to which it is attached;

n is an integer of 1, 2, 3, or 4; and

wherein at least one cycloalkane ring is present; or

Art Unit: 1796

ii) the bond between C1 and C2 together with the dotted line represents a double bond;

- R¹ is methyl, ethyl,/-propyl, n-propyl;

- R² is hydrogen or methyl;

- R³ and R⁴ together is hydrogen or methyl; and

- R⁵ is hydrogen, methyl, ethyl,/-propyl, n-propyl, n-butyl, tert-butyl or sec-butyl

With respect to claim 2, the applicant is advised to elect of the species of the Markush group listed in the claim.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: the functional groups have different properties and function differently.

There is no claim found to be generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the compound of formula I in claim 1 is obvious over Hoan. Hoan teaches the (4-but-1-enyl-phenyl)-methyl sulfide (Journal of Organic Chemistry, 1952, vol. 17, pp. 350-356).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
